CURRENT EXPERIENCE

LUMIFY AI

Co-Founder & Chief Creative Technology Officer

2024 - Present

Product + interaction
Lead the creative vision and browser-based UX for image, video, and 3D/world workflows.

Canvas to production
Connect saved projects, approved reference libraries, shot direction, and the Cut. Retain earlier takes and make selection for the edit explicit.

Artist-directed controls
Shape relighting, material, time-of-day, and camera tools; reviewed batch stills and shot video; speech, music, and sound workflows.

Full-stack delivery
Build responsive JavaScript interfaces and Python/Flask services for provider routing, asynchronous jobs, result registration, and saved revisions.

Review + accountability
Implement quote review and explicit generation approval, source lineage, job status, approved cost estimates, and review MP4 assembly.

Model integration
Connect Runway, fal.ai, World Labs, and local services through capability-aware controls and deployment policies.
