RONNIE CLELAND

CREATIVE AI PLATFORM ARCHITECT

Artistic vision. Human control.

I build creative AI tools that keep artists in control of the next decision.

20+ YEARS OF CRAFT / ANIMATION / VFX / REAL-TIME

RONNIECLELAND.COM

THE FOUNDATION

The craft comes first.

20+ years of production experience shape how I design creative systems.

DREAMWORKS / 2010 - 2021

Department Chair, Look Development Supervisor, and Environment Surfacing Lead.

REAL-TIME + INNOVATION

Spire Animation (2021 - 2023). FableLight Studios (2023 - 2024).

VISUAL JUDGMENT

Lighting, materials, composition, and review at feature-film scale.

LUMIFY / PRODUCT OWNERSHIP

Creative intent. Connected work.

Co-Founder & Chief Creative Technology Officer / 2024 - Present.

PRODUCT + DESIGN

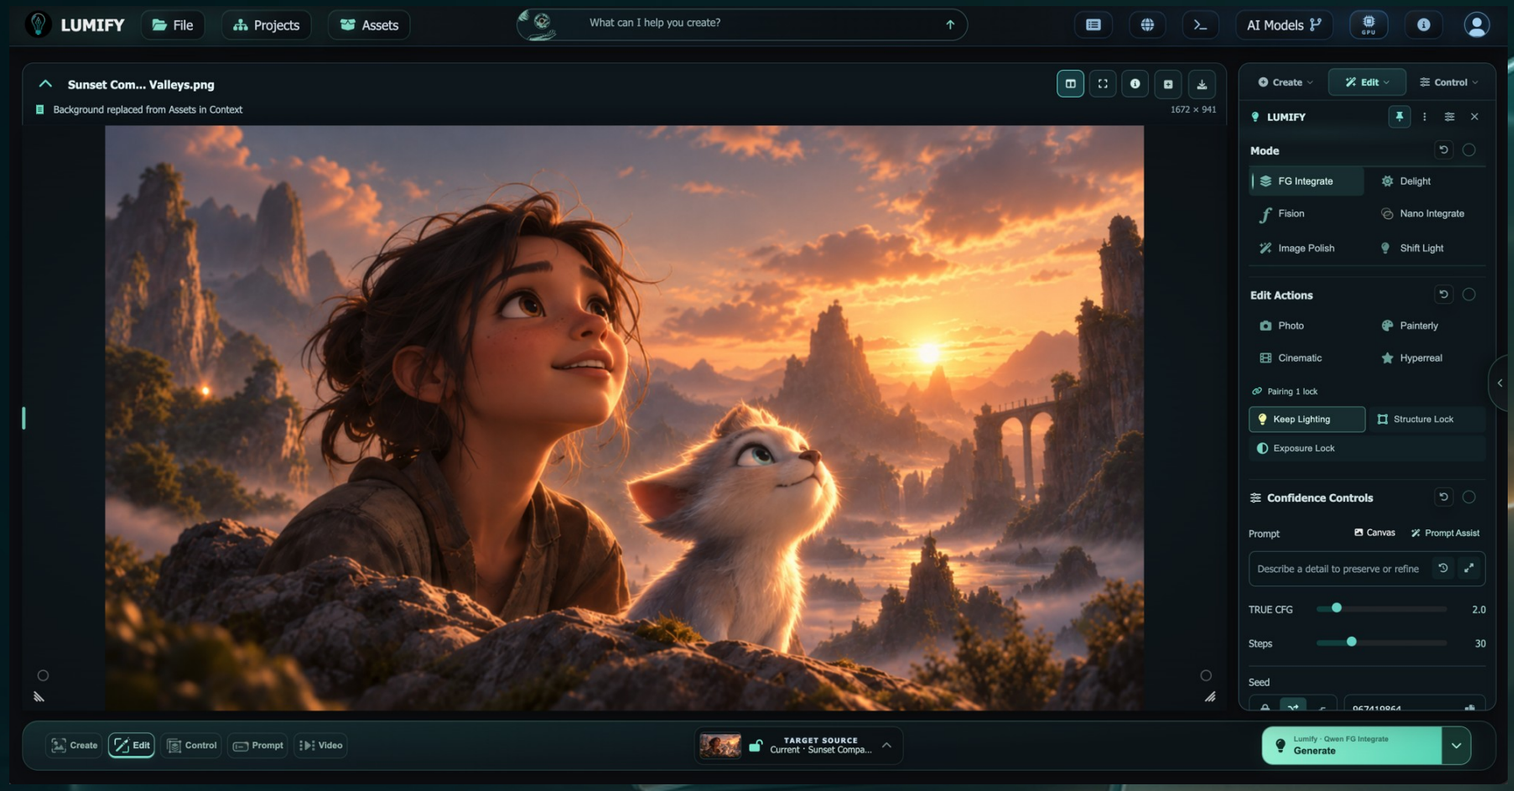

Lead the creative direction and artist-facing interaction design.

FULL-STACK OWNERSHIP

Connect responsive interfaces to Python/Flask services and model routing.

ONE CREATIVE CONTEXT

Bring the canvas, references, shots, and the Cut into a connected workflow.

LUMIFY V2 / WORKING INTERFACE

REFERENCES / CONTEXT

The idea has a visual history.

Begin with the material the artist has already chosen.

REFERENCE LIBRARY

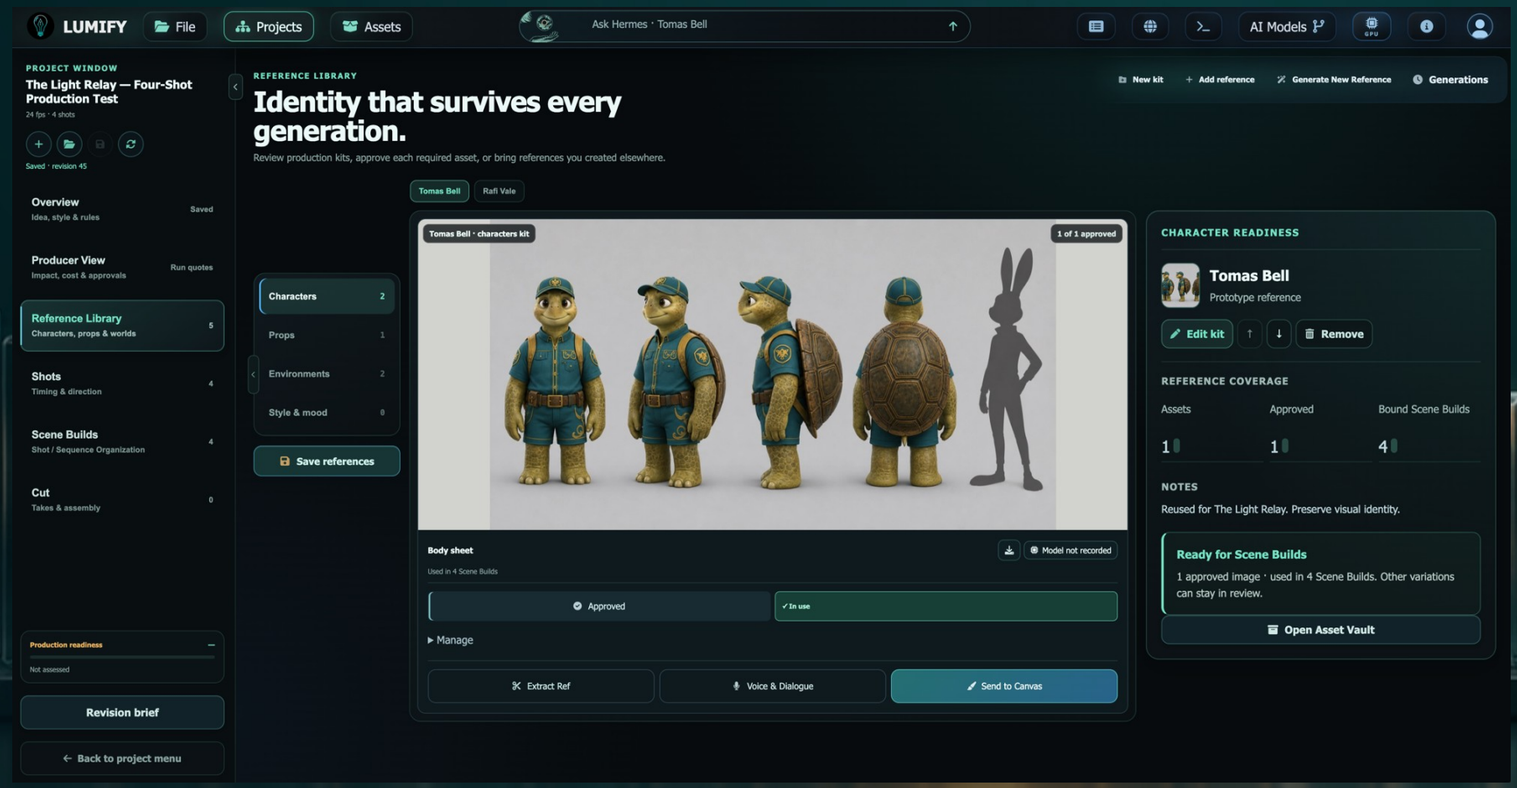

Organize source material and assign reference roles.

APPROVAL + LOCK

Review imported references and preserve approved Library context.

SAVED DIRECTION

Carry shot and camera choices into generation and review.

LUMIFY V2 / WORKING INTERFACE

GENERATION / APPROVAL

A clear action.
An informed choice.

Make creative direction and generation costs visible before the run.

BATCH STILLS

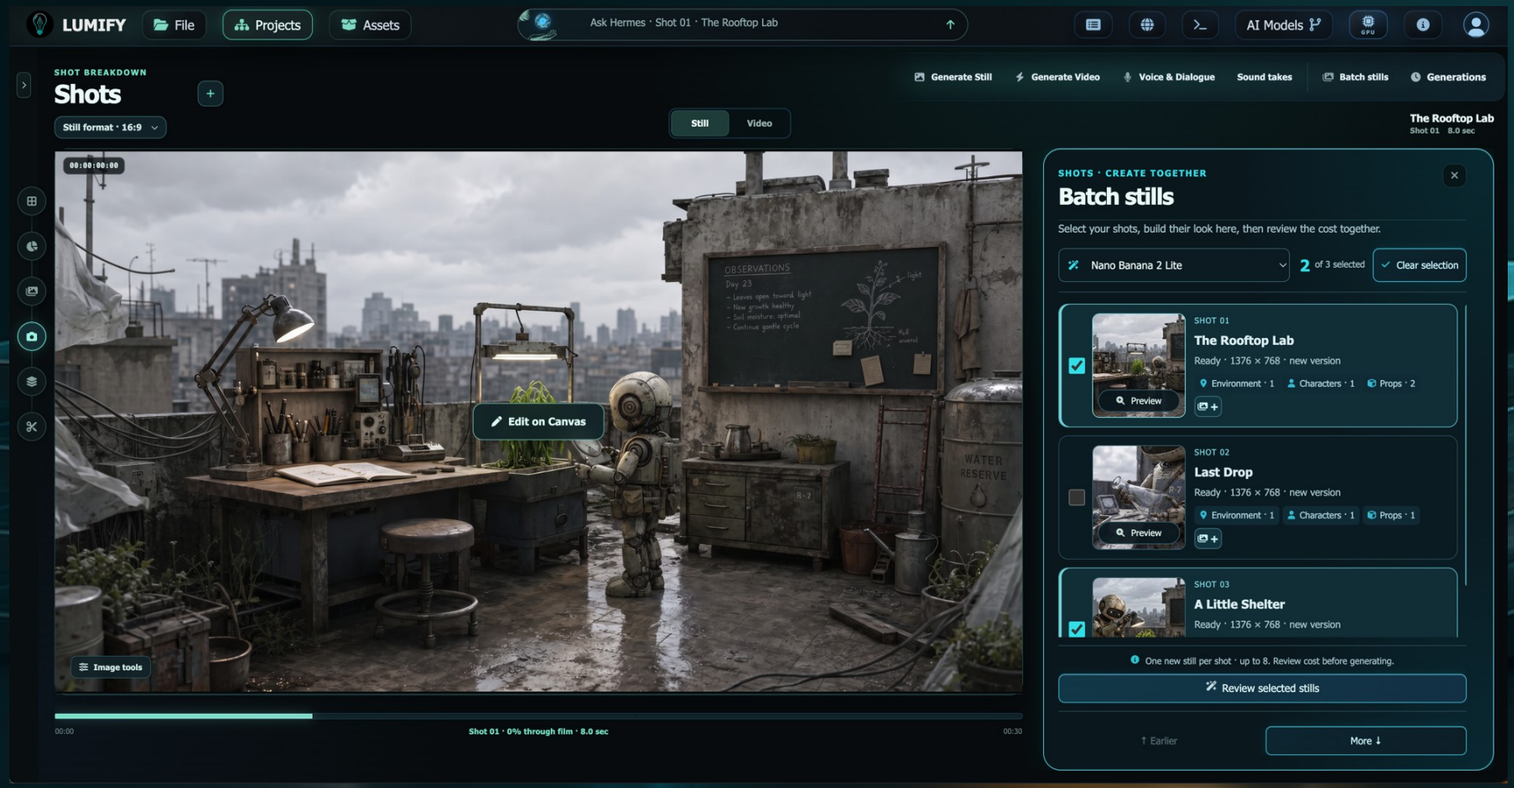

Select shots and shape their look together.

QUOTE + APPROVAL

Review estimates and explicitly approve chargeable generation.

VALID CONTROLS

Match available settings to the model, task, and deployment policy.

LUMIFY V2 / WORKING INTERFACE

SHOTS / ITERATION

Every take is a creative choice.

Keep alternatives available as the work evolves.

RETAINED TAKES

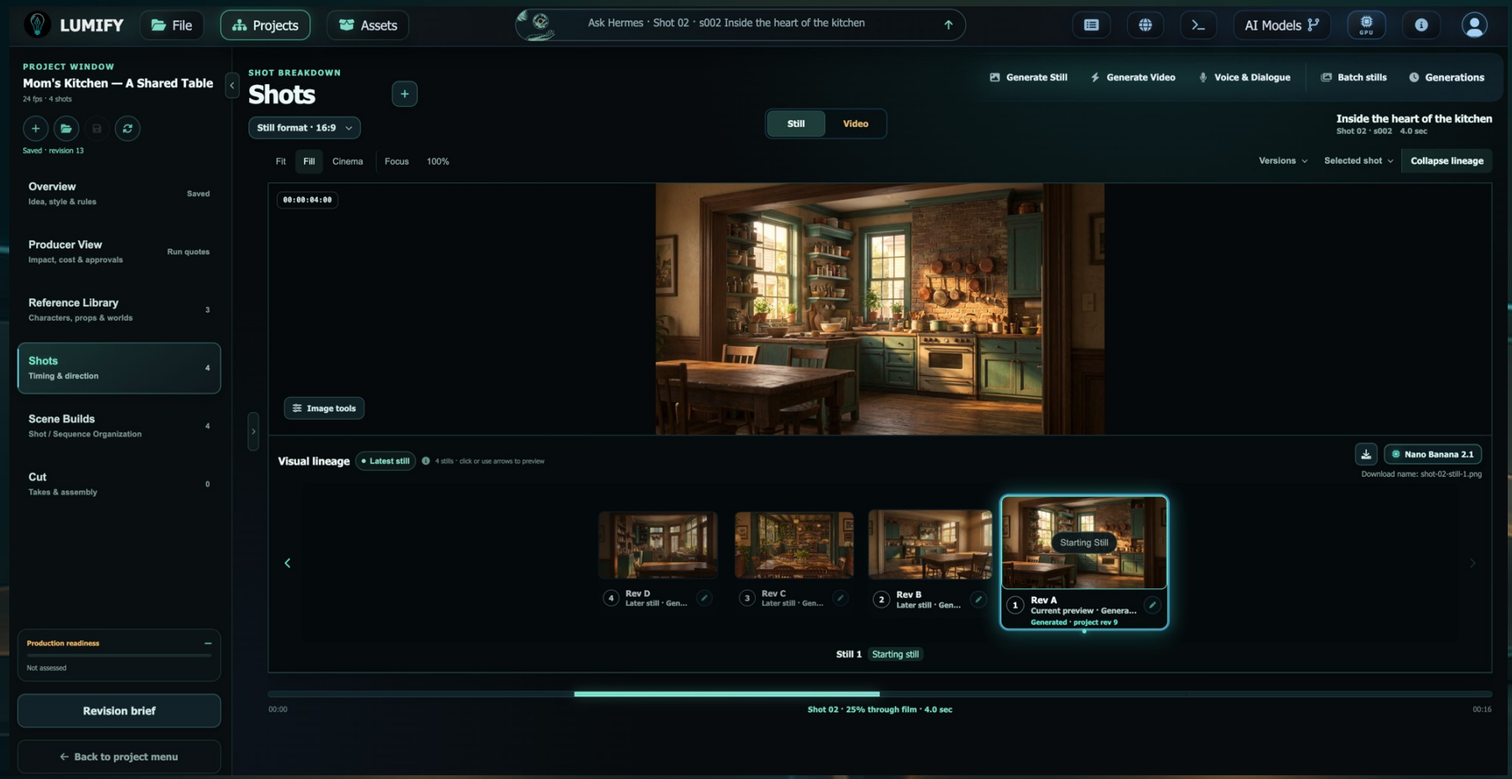

Return to earlier results and compare options.

SHOT VIDEO

Generate from approved inputs and supported model contracts.

ARTIST SELECTION

Preview a take before explicitly choosing Use in Cut.

LUMIFY V2 / WORKING INTERFACE

THE CUT / EDITORIAL CONTINUITY

The choices become a sequence.

Carry approved takes into a saved edit and a visible path to review.

EXPLICIT SELECTION

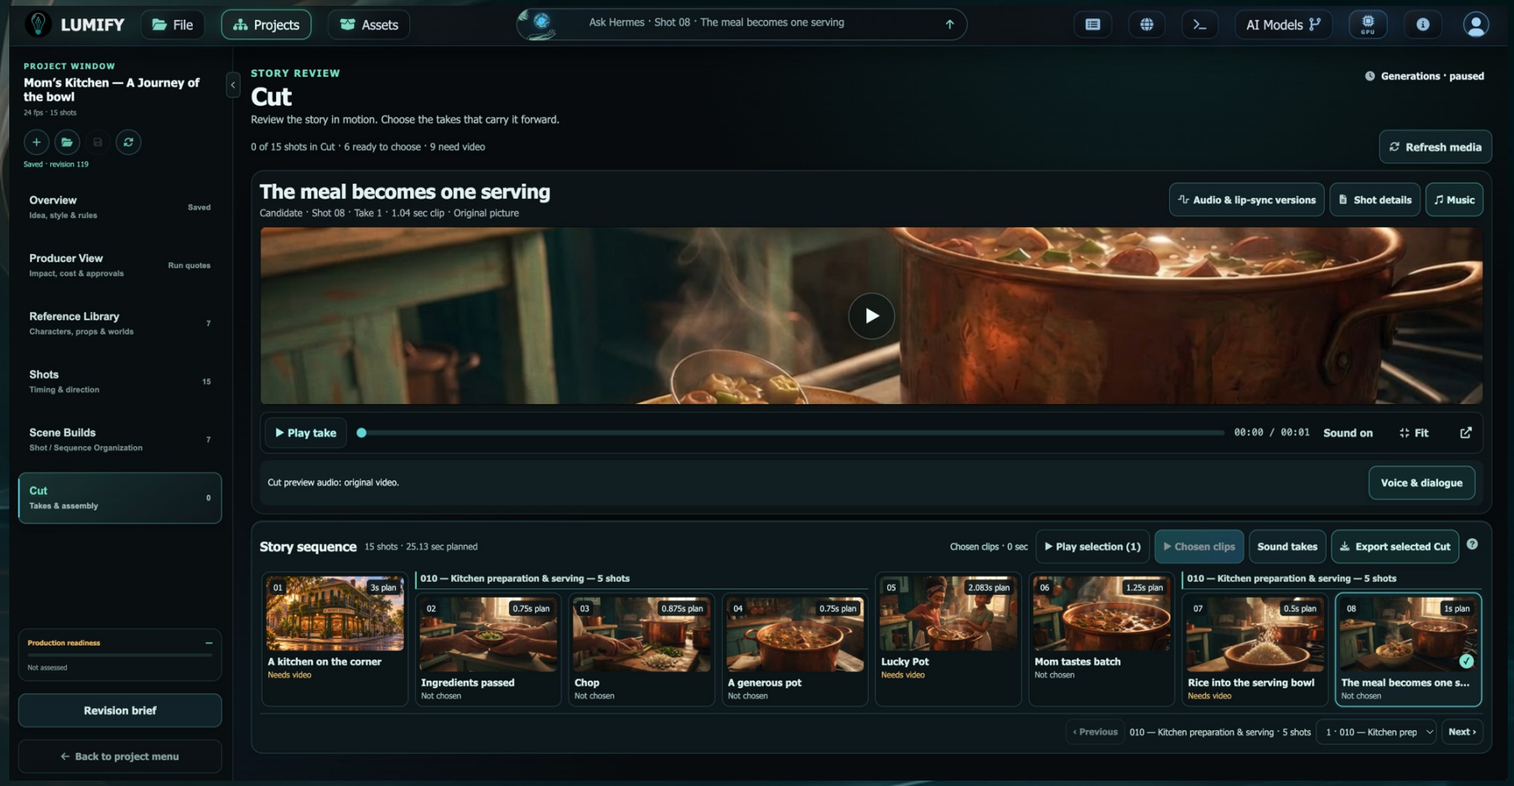

Assemble the takes the artist chooses.

TIMING + REVIEW

Arrange shot timing and export a review MP4 from saved video selections.

SOUND + STORY

Support speech, music, and sound within the project.

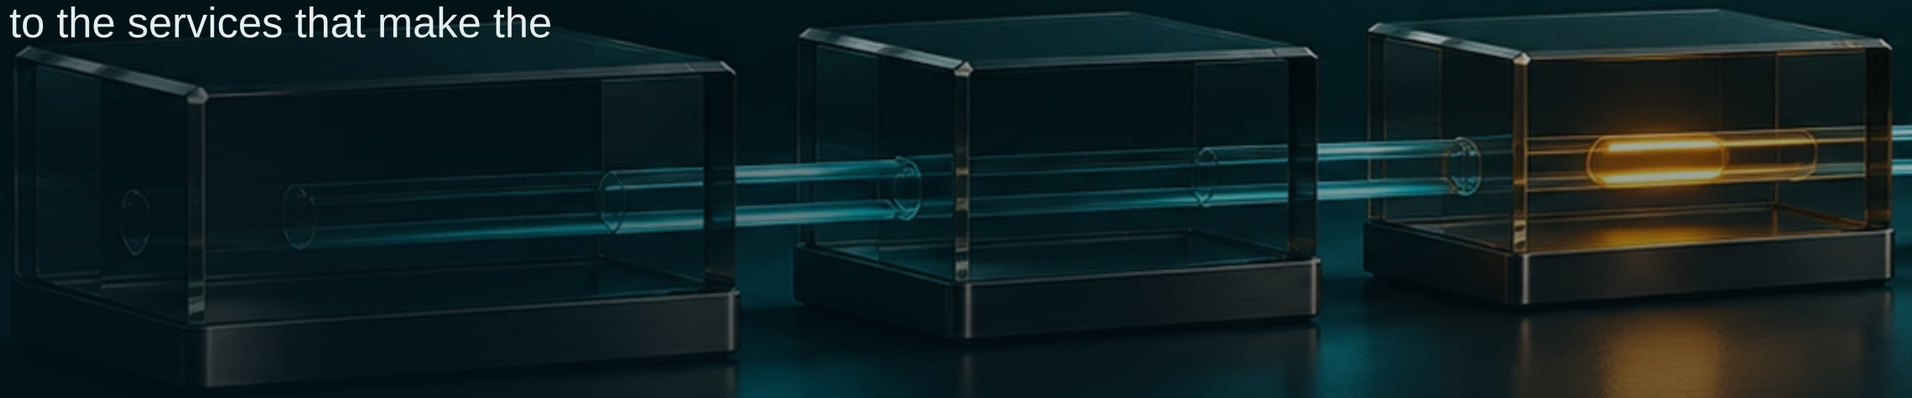

LUMIFY V2 / WORKING INTERFACE

ARCHITECTURE / END-TO-END OWNERSHIP

The system carries the creative intent.

I connect what the artist sees to the services that make the work possible.

INTERACTION

JavaScript and HTML/CSS. Direct controls, validation, and visible feedback.

ORCHESTRATION

Python/Flask, REST APIs, server-controlled routing, job status, and recovery.

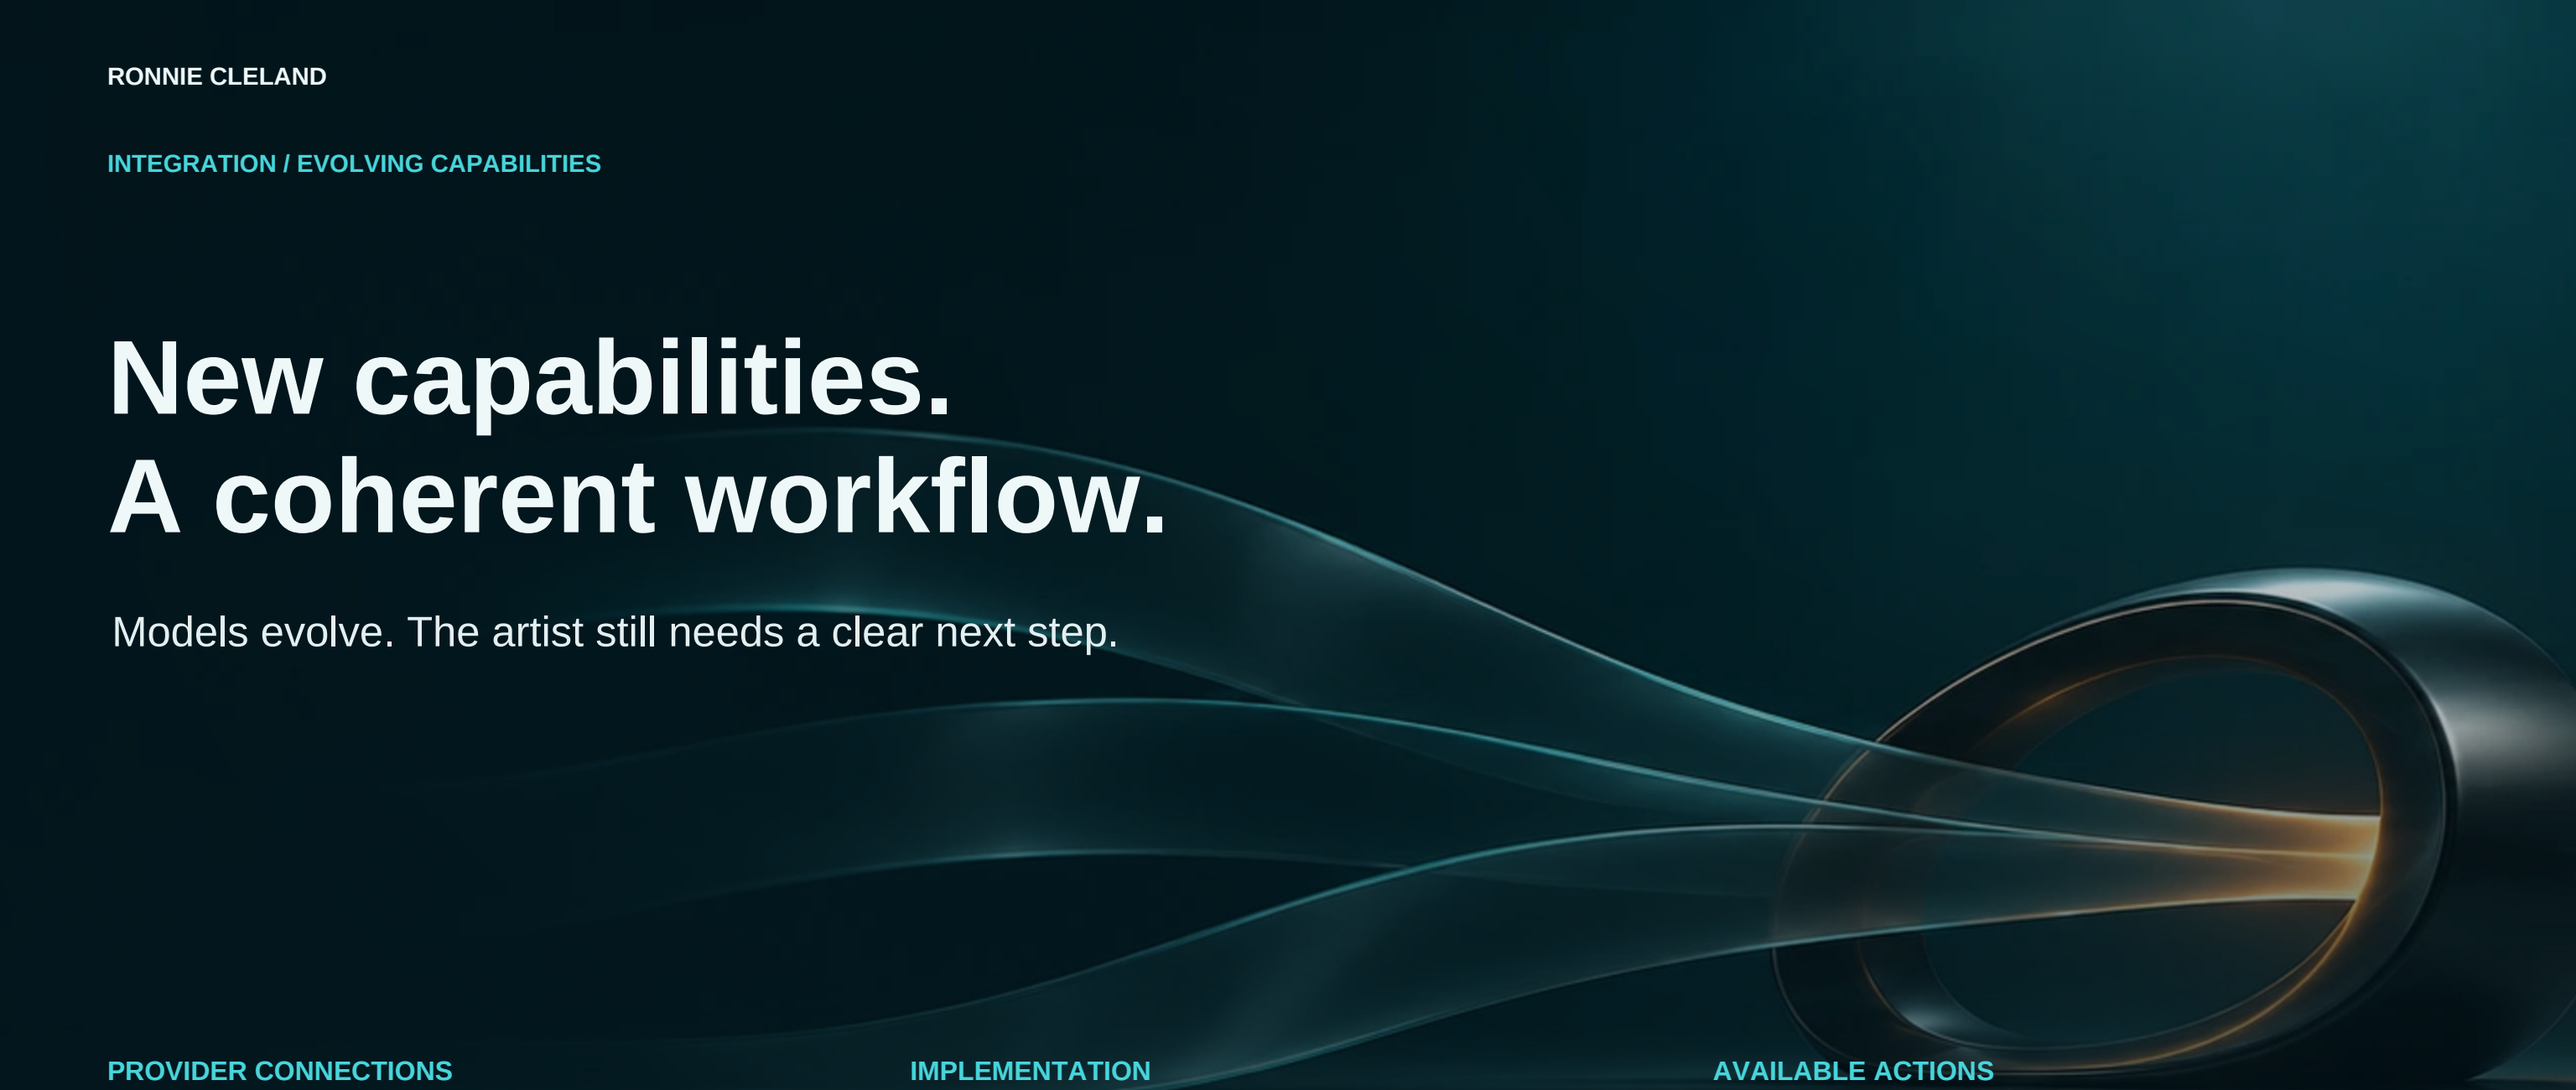

CONTINUITY

Saved revisions, source lineage, provider provenance, and review export.

INTEGRATION / EVOLVING CAPABILITIES

New capabilities.
A coherent workflow.

Models evolve. The artist still needs a clear next step.

PROVIDER CONNECTIONS

Runway, fal.ai, World Labs, and local model services.

IMPLEMENTATION

Model adapters and AI Toolkit. Working knowledge of PyTorch/CUDA, Diffusers, and Transformers.

AVAILABLE ACTIONS

Model contracts and deployment policies define the supported controls.

SPATIAL THINKING / REAL-TIME CRAFT

A world beyond the frame.

Materials, light, and camera direction connect image-making with spatial exploration.

IMAGE DIRECTION

Relighting, material, time-of-day, and camera workflows make intent actionable.

REAL-TIME FOUNDATION

Unreal Engine and Substance experience in world building and look development.

SPATIAL WORKFLOWS

3D and generated-world integrations extend the creative vocabulary.

DESIGN OUTCOMES / ARTIST CONTROL

Confidence comes from visible decisions.

Give artists a process they can inspect, revisit, and direct.

BEFORE GENERATION

Review references, supported settings, and estimated costs.

DURING ITERATION

See job status, retain earlier takes, and trace source context.

AFTER REVIEW

Select takes for the Cut, protect saved revisions, and assemble work for review.

LET’S CONNECT

An artist’s eye.
A builder’s mind.

Creative AI products, visual workflows,
and tools that serve the person creating.
